

## VEGA

### Night Vision Goggles

If low-cost, high quality head-mounted night vision is what you need, the Armasight Vega is the best choice. The Generation 1 Vega comes complete with a head mount (which allows the unit to be positioned over either eye) and it is the perfect in-expensive hands free option for air soft games, paintball, hunting or security – for these activities at night, the Armasight Vega will give you the edge. A built-in short range IR illuminator allows the Vega to work well even in complete darkness, and an optional Armasight long range infra-red illuminator will dramatically boost viewing range if required. The Armasight Vega features all-glass optics, a single push-button control and rugged reinforced composite housing.

- Ⓐ **Compact and lightweight**
- Ⓐ **Designed for hand-free operations**
- Ⓐ **High resolution Gen. 1+ Image Intensifier Tube**
- Ⓐ **Built-in flood infrared illuminator**
