MINOX BL 8x56 HD

The powerful classic hunting binoculars of the BL line have proved themselves as the perfect companion for wildlife and nature observation even in moonlight or in twilight conditions.

The 56 mm model has now been fully revised with a further optimised performance – the new design features a practical comfort bridge, higher contrast, an exceptionally large field of view as well as enhanced reduction of light diffusion for an unmatched viewing experience!

Whether out hunting or observing nature, this open design of the BL 8x56 HD allows a reliable, one-handed operation for greater freedom of movement and offers the user an excellent grip, even when the going gets tough.

The powerful optical systems have

multi-coated lenses that guarantee the best possible optical performance and neutral colour rendition of the object in view. The objective lenses additionally feature innovative HD glass for improved colour correction and higher light transmission. Thanks to multi-coated roof prisms with phase correction coating, the user is given an image with stunning detail and high contrast, even in poor light conditions.

Eyeglass wearers can enjoy an extremely wide field of view of 136 m without vignetting, thanks to the extended eye relief. Twist-up eyecups with click stops are another comfort feature of these field glasses.

The new BL HD binoculars are made in Germany at the main factory in Wetzlar where they are also subjected to a rigorous quality control

The scope of delivery includes a neoprene strap as well as an ever-ready case.
