

GECO RED DOT 1x20

Item no. 2319219

The ideal companion for hunting fast-moving game over rugged terrain. The finely staged, dimmable illuminated dot with 2 MOA diameter lets you acquire the target quickly and intuitively. The built-in Weaver mount means the GECO Red Dot can be attached quickly and easily.

<i>Length (mm)</i>	67
<i>Weight (g)</i>	130
<i>Field of view (m/100)</i>	100
<i>Reticle</i>	2 MOA Dot 1x20

GECO 1" Riflescopes

GECO optical sights are unique in both the optical and mechanical quality and performance that they offer in this price class.

The 3x zoom riflescopes catch the eye with their slender and extremely compact length and low weight thanks to the 1" central tube diameter. The narrow central tube suits older mounts especially. The excellent optical quality is reflected in the very good fields of view and high transmission values. Large lens diameters ensure sufficient light reserves that extend deep into twilight. The fine, illuminated GECOdot with automatic shutoff (automatic reflex sight) and the integrated target turret (sight tower) GECOtrac are unique features in this class. All products have a 5-year warranty.
